MENTAL HEALTH

Is public assistance for individuals with Mental Illness effective, and how those resources can be improved?

By Carrie T

Data Source: Retrieved from Kaggle under the Mental Health search.

- Data is comprised of questions given to 334 individuals through a Survey using “Survey Monkey”
- As you can see, most questions require Yes or No responses

Cleansing Process

Cleansing Process

Data was inputted into numeric values of “0” as No and “1” as Yes.

- Headings were very long so I shortened them to reduce space
- Font Change to Arial
- Placed NULL in blanks that had no response
- Deleted 1 column (30 columns existing)

** I used an IF statement in excel to change the Columns:
=IF(U2:U335=0, "NO", "YES")*

- ## Cleansing Process

Numeric

Categorical

1st Heading

	A	B	C	D
1	I am currently employed at least part-time	I identify as having a mental illness	Education	I have my own computer separate from a smart phone
2	0	0	High School or GED	0
3	1	1	Some Phd	1

Shortened Heading

A	B	C	D
Employed at least part-time	Identified having a Mental Illness	Education	Has computer separate from a cell phone

PERCENT OF DEPRESSION BETWEEN MEN AND WOMEN

Analyzing Data

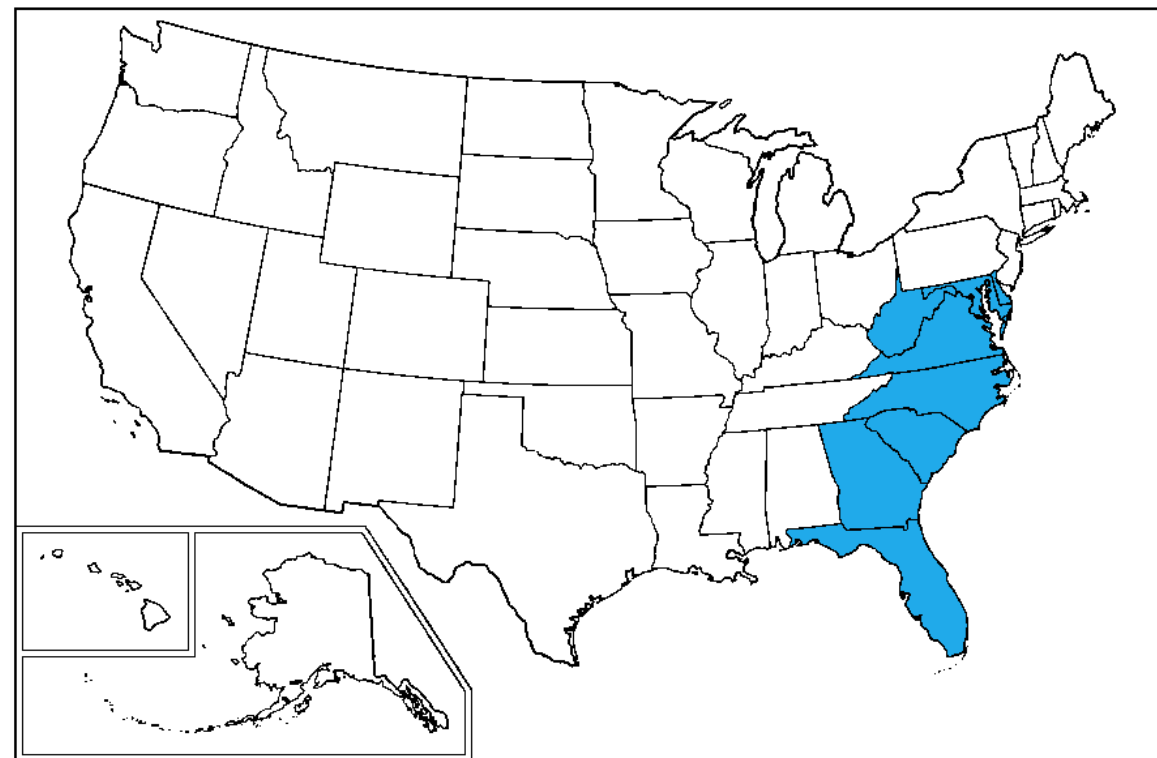

I choose different ailments and assistance that an individual may receive regarding their Mental Health

- I began with Depression to see what data stood out. I choose that illness because according to WHO (World Health Organization) Depression is the leading cause of disability and ill health globally

COUNT OF DEPRESSION BY GENDER

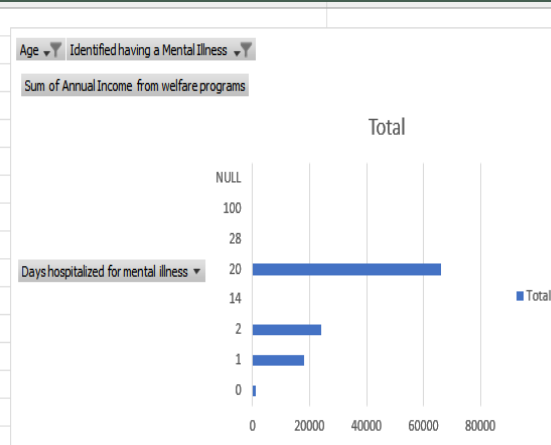

Count of Welfare Recipient by Region

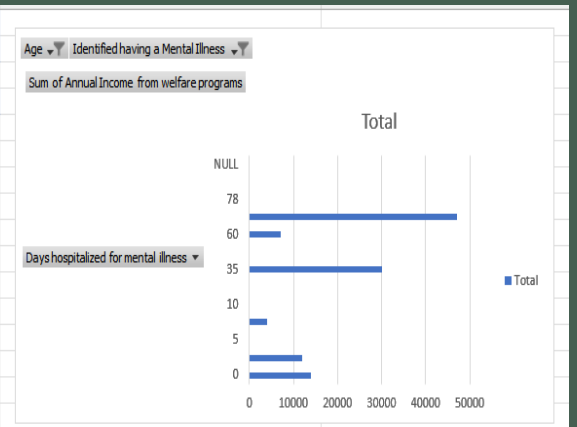

63 people out of the 334
receive welfare In the South
Atlantic Region.

Annual Income from Welfare Programs with Hospitalizations by Age

Age	18-29
Identified having a Mental Illness	YES
Days hospitalized for mental illness	Sum of Annual Income from welfare programs
0	1000
1	18000
2	24000
14	0
20	66000
28	0
100	0
NULL	0
Grand Total	109000

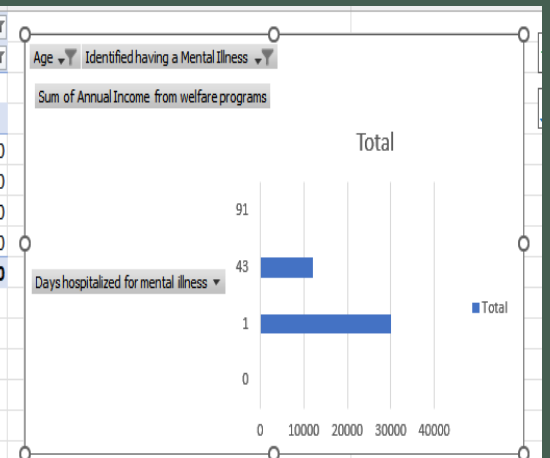

Age	30-44
Identified having a Mental Illness	YES
Days hospitalized for mental illness	Sum of Annual Income from welfare programs
0	14000
1	12000
5	0
8	4000
10	0
15	0
35	30000
42	0
60	7000
65	47000
78	0
100	0
NULL	0
Grand Total	114000

Age	45-60
Identified having a Mental Illness	YES
Days hospitalized for mental illness	Sum of Annual Income from welfare programs
0	0
2	10000
5	0
8	100000
14	0
27	13000
Grand Total	123000

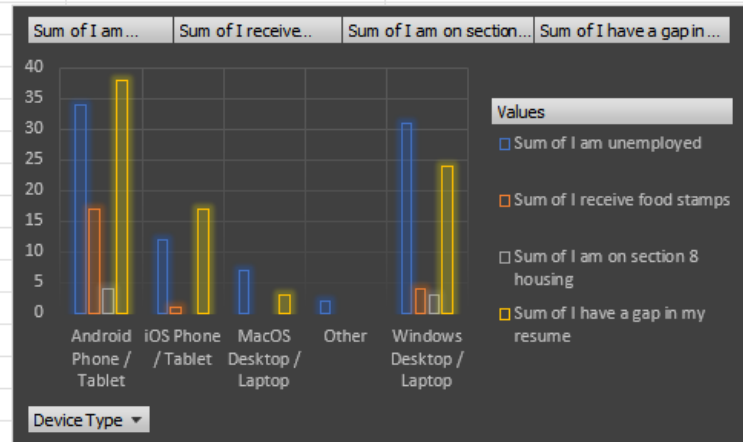

Age	> 60
Identified having a Mental Illness	YES
Days hospitalized for mental illness	Sum of Annual Income from welfare programs
0	0
1	30000
43	12000
91	0
Grand Total	42000

UNEMPLOYED AND
ASSISTANCE PROGRAMSType of Device available to
use

Row Labels	Sum of I am unemployed	Sum of I receive food stamps	Sum of I am on section 8 housing	Sum of I have a gap in my resume
Android Phone / Tablet	34	17	4	38
iOS Phone / Tablet	12	1	0	17
MacOS Desktop / Laptop	7	0	0	3
Other	2	0	0	0
Windows Desktop / Laptop	31	4	3	24
Grand Total	86	22	7	82

Overall recipients **197**

Key Points

With all the data shown it's clear that public assistance that is available is not enough to aid the 334 individuals Mental Health.

- From the Percentage of Depression in Male and Female
- To the South Region with the most Welfare
- 60 and up who's been Hospitalized with only \$42,000 in aid
- 197 people who are unemployed, receive section 8, Foods Stamps and gaps in employment will make it difficult to find work, treatment and care without further resources for direction to be in a better position for a healthier lifestyle

I propose that all the individuals would get better direction and help if there was an APP to help Search and give Links to partnerships that endorse resources depending on these key areas.

Location of individuals
needing aid (Search by
City/State)

Men and Women's
Groups (Search by
Mental Illness)

Hospitals that offer
Therapy/Outpatient
Groups (For previous or
post Hospitalizations)

Elder care and
Activities/Transportation
(Ages 60 and up)

Local Churches for Food
and Skills Classes
(Unemployed)

With Device Access,
there are Several Free
Apps to help manage
Mental health
challenges based on
the specific symptom
